

To Whom It May Concern:

Any sleep center that is considering partnering with an organization for home medical equipment, look no further. We have been partnering with Nationwide for almost 3 years now and it's probably one of the best things we could have done for our patients. Our relationship with Nationwide Medical Inc. allows us the benefit of providing our patients with CPAP/BiPAP and masks while Nationwide monitors compliance and provides an excellent program for replacing masks, mask cushions, filters, tubing and humidifier chambers. Our patients that are set up through Nationwide have the option of receiving their replacement accessories through the mail at the intervals permitted by their insurance company. A nice convenience for all of our patients! Not to mention a huge convenience for our referral sources. We handle all aspects of the sleep testing from the sleep studies to ordering CPAP/BiPAP and consultation and management. Our referring physicians know that we will meet the needs of their patients when it comes to sleep disorders.

HOW DOES IT WORK?

Nationwide mails the equipment, supplies and paperwork to our location and helps track our inventory. If we need any additional supplies or have questions, Nationwide is only a phone call away.

If your sleep lab is considering setting up patients on CPAP/BiPAP, I strongly recommend giving Nationwide a call.

Sincerely,

A handwritten signature in cursive script that reads "Tony Stigall".
